

# APL<sup>™</sup> GLOCK<sup>®</sup>

The APL Compact is a brand new INFORCE product providing 200 lumens of vibrant white light with up to 1.5 hours of runtime. Ultra-light and durable inside and out, weighing less than 2 ounces, it provides a high-intensity tight beam to fill your field of view for close to mid-range target identification. The water-resistant, glass reinforced polymer body is incredibly powerful and ultra-compact. Extensively tested, it mounts completely flush with the muzzle of a Glock 19 and offers constant and momentary operating modes. Textured paddles for a non-slip grip and ambidextrous on/off switches enable left or right hand activation. In addition, the easy-to-operate lockout system ensures the light isn't activated until you're ready.
